

# Health and safety plan for contractors undertaking possum shooting

---

This plan has been developed to help protect against hazards associated with possum shooting carried out on residential and rural properties. Under the Health and Safety at Work Act 2015 the Otago Peninsula Biodiversity Group (OPBG) will make every effort to enable their contractors, members, participants, members of the public and people in the vicinity to return home safely each day. As a contractor, you are responsible for taking all practicable steps to ensure your own safety and that of others associated with your work, such as volunteers, employees and property owners.

## Hazards and their management

Three main categories of hazard are considered in this safety plan:

1. Environment: may include the terrain, water bodies (e.g. streams), weather conditions, fire and vegetation.
2. Resources and equipment: may include the use of traps, firearms and vehicles.
3. People: may include failure to follow instructions, undisclosed or unrecognized medical conditions, wearing clothing that is inadequate for the conditions, and inadequate fitness or agility for the task being performed. Account also needs to be taken of risks to residents and pets on a property.

The attached Hazard Identification Form lists the hazards that have been identified by OPBG in each of these categories and the actions that should be taken to eliminate or minimise each hazard. In most cases the actions listed are intended to minimise the hazard involved.

## Safety briefing

As a contractor working for the Otago Peninsula Biodiversity Group you will be given a safety briefing at the start of work by the team leader (Trustee, Project Manager, Operations Manager or other designated person). The briefing will identify the significant hazards and the techniques or behaviours intended to isolate or minimize them. In all cases you are expected to follow the reasonable directions of the team leader in charge of the work.

## In the event of an incident

- Stay calm, think things through before acting
- Call out, ask for assistance from residents or neighbours
- Assess the situation, ensure the scene is safe for you and others, check for potential hazards
- Reassure the injured person, administer first aid
- Call for medical assistance

## Other persons

As a contractor you are obliged to brief anyone working for you on the Health and Safety Plan for this work; for example, advice on suitable clothing and footwear, identification of the hazards and actions that should be taken to reduce the risks associated with each hazard.

## Incident/near-miss reporting

Report all incidents involving injury and near-miss incidents to the team leader coordinating your work. The information you report will assist the OPBG in identifying a safety problem and how it might be addressed, both for your safety and the safety of others.

## Feedback on this safety plan

Any comments you have on this plan, including changes to suggested actions or the identification of additional hazards, will be welcomed and will help OPBG to improve its safety planning. Please provide feedback to the team leader coordinating your work or any of the following safety contacts.
